

Key Project Information

Project Title: RAF Shawbury Fire Station, Locker Rooms

Project Description: Locker Room Extension

Construction Method: SIPS

Programme Dates: December 2023 – February 2024.

(9 weeks)

We were thrilled to be entrusted with the construction of a new Locker Room Extension at RAF Shawbury. In addition, a canopy walkway connecting to the main fire station building

The ground was broken in mid-December, and just 9 weeks later, the project was successfully completed and handed over.

The building's superstructure is composed of SIPS (Structural Insulated Panels). This means that the main structure was swiftly erected and made watertight within one week and finished with Cedral cladding.
